AI at work: the one page

Example Electrical Ltd · summary of the AI usage policy effective 1 December 2026

In doubt: enter nothing, ask.

Ask Office management (in person or by phone, ext. 12). No list covers every case; this sentence does.

This never goes into an AI tool, whatever the access:

- ☐ Data about customers, staff and applicants by which a person is identifiable
- ☐ Access data, passwords, keys, access codes
- ☐ Calculations, prices, contracts, customer lists: everything the business keeps confidential
- ☐ Health data
- ☐ Documents of third parties handed to us in confidence
- ☐ Calculation sheets per job

Only through the business access.

Allowed are the tools listed in the tool register with approval "yes" or "yes with restriction" (within the restriction). Private accounts: not for work tasks.

Approved tools (as of _____): _____

Check before use, every time:

- ☐ Figures and prices
- ☐ Names and addresses
- ☐ Deadlines and dates
- ☐ References, standards, sources: AI tools invent them in the correct format

Something happened? Report it.

Entered something confidential, or a mistake went out? Report immediately to Office management (in person or by phone, ext. 12, same day). The report itself has no consequences.

`The full policy is kept at: Shared drive, folder "AI policy".`

Sample · page 1 of 1 · The complete document comes from the toolkit.
